-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

1. ☒ The amendment filed on 17 March 2004 under 37 CFR 1.312 has been considered, and has been:

a) ☐ entered.

b) ☐ entered as directed to matters of form not affecting the scope of the invention.

c) ☐ disapproved because the amendment was filed after the payment of the issue fee.

Any amendment filed after the date the issue fee is paid must be accompanied by a petition under 37 CFR 1.313(c)(1) and the required fee to withdraw the application from issue.

d) ☒ disapproved. See explanation below.

e) ☐ entered in part. See explanation below.

The specification does not support amino groups on the aryl rings of formulae I, II or III, thus the analogy to formula I fails and the amendment would be new matter if entered. Filing of a CIP application would appear to be necessary to capture this limitation. Given that NR4+ is also found in the claims, it is not clear that the correction would be the proposed amino group.
